Description

Arafura Traffic Control and Line Marking offers a complete range of Traffic Management and Line Marking Services available across the Northern Territory, with offices in Darwin, Alice Springs and Katherine. With years of experience, Our WZ1 accredited Traffic Management Plan designers create Traffic Management Plans and Traffic Control Diagram's specifically to any project, along with permit applications. Our staff provide traffic management consultancy for clients to ensure that their specific needs are met to increase the safety of any operation and project. All traffic control staff have accredited WZ2 and WZ3 certificates and are knowledgeable of the Australian Standards 1742.3 and apply them to any worksite in order to maintain compliance with any road authority here in the NT.

Arafura Traffic Control have a large range of equipment to offer our clients, including a variety signage, cones, bollards, Visual Message Boards, Arrow Boards, portable traffic signals, lighting towers, temporary fencing, water-filled barriers, and more! Our involvement in the Traffic Management Association of Australia and the Civil Contractors Federation allows Arafura to provide the latest and most innovative traffic management solutions, designed to meet all requirements.

Arafura Line Marking offers a wide range of pavement marking services as well as the supply and installation of roadside furniture. Our variety of materials, stencils, paints, furniture, and equipment are of the highest quality and are compliant to Australian Standards. Arafura Line Marking offer a large range of services for our customers:

- Road and Pavement Safety Markings
- Coloured Treatment
- Custom Stencils and Markings
- Raised Reflective Pavement Markers (RRPM's) and Solar LED RPM's
- Supply and Installation of Tactile Indicators/Edges
- Line Marking Removal
- High Friction Surfacing
- Cold Applied Plastic
- Minor Asphalt/Concrete Repairs and Crack Sealing
- Supply and installation of Safety and Traffic Signage

Our experienced and qualified staff carry out the working using two types of Borum Machines.

The Borum Master 2000 is an agile line marking machine

suitable for transverse and complex markings with line widths ranging between 10cm and 30cm. The Master 2000 has a sharp turning radius - perfect for intersections and roundabouts. The two 440 L material tanks are designed specifically for two-component paint, including Cold Applied Plastic paint. Capable of using a 98:2 spray or extrusion method, the Borum Master guarantees precision and accuracy with every line. Equipped with a front sweeper, the Borum machine creates a clean path for seamless paint application. This machine is also calibrated to release glass beads at a set rate to achieve optimal reflectivity in accordance with Australian Standards.

The Borum Master 5000 can execute line widths from 8cm to 100cm, ideal for longitudinal pavement marking of

motorways, roads or airport runways. With a material tank capacity of 1,000 L, the Borum 5000 is perfect for large scale projects. Fully equipped with a two-seat drive and operator section, the Borum 5000 allows for flexible working conditions on either side of the roadway. Equipped with a front sweeper, the Borum machine creates a clean path for seamless paint application. This machine is also calibrated to release glass beads at a set rate to achieve optimal reflectivity in accordance with Australian Standards. We are committed to providing concentrated, attentive customer service and advice to ensure that we meet all of your individual requirements. Arafura Traffic Control and Line Marking believe in 100% customer satisfaction, therefore operate 24 hours, 7 days a week.
