Subsea Works specialise in the expertise and competence required to safely and proficiently complete a variety of underwater services and operations in all coastal, inland and marine environments.

Summary

Subsea Works provides commercial diving services throughout the east coast of Australia with offices located in Sydney and Brisbane.

We strive to provide the highest levels of safety, efficiency and quality in the execution of underwater construction, inspection and maintenance projects.

Description

Subsea Works specialise in the expertise and competence required to safely and proficiently complete a variety of underwater services and operations in all coastal, inland and marine environments.

Subsea Works have the resources and manpower to complete most underwater construction, inspection and maintenance services in almost every environment. With a highly experienced team of staff and specialised equipment we offer a comprehensive range of underwater and marine services.

Subsea Works firmly believe in using the right tool for the job and this is especially the case when it comes to working underwater. We pride ourselves on utilising only the leading brands and equipment to ensure that all of our work scopes are completed safely, efficiently and properly.

Our surface supplied diving systems contain levels of redundancy in breathing air and communications in order to

maximise diver safety. We have a range of dedicated subsea equipment at our disposal which can be easily mobilised throughout Australia and the South Pacific region.

Subsea Works are proud of our highly skilled and knowledgeable work force. From our dedicated and committed management team to our expert and hard working staff, our specially trained personnel are an asset to our business and a benefit to our valued clients.

We have built up an enviable team of the most experienced divers and supervisors with valuable experience in onshore, inshore and offshore operations accustomed to strong currents, zero visibility and deep depths.

Our ability to provide such a professional team on our projects results in the work scope being completed safely, efficiently and to a high standard saving our valued clients time, money and adverse risks.

Industries Served

- > Clean Energy
- > Construction & Engineering
- > Defence
- > Oil, Gas & Energy
- > Rail
- > Water

Facilities and Equipment

- > Located in Sydney and Brisbane with the following assets:
- > Dive Support Vessels in AMSA survey
- > Mobile and containerised diving spreads compliant with AS/NZS 2299
- > Industry leading Kirby Morgan diving helmets and bandmasks
- > Kirby Morgan and Amron dive control and communications panels
- > Underwater welding and Broco oxy-cutting spreads
- > Subsea dredging and airlifting spreads
- > Hydraulic and pneumatic tooling for underwater and marine use
- > Underwater and surface NDT equipment
- > Dedicated contaminated and potable water diving spreads
- > Underwater video and digital still photography equipment
- > HP and LP breathing air compressors purity tested to Australian Standards
- > Medical first aid and emergency oxygen kits
- > Access to a large range of vessels and associated plant including work boats, tug boats, barges and cranes

Products & Services

- > Commercial Diving and Marine Services including:
- > Bridge, wharf and jetty construction and demolition support
- > Industrial marine infrastructure construction, inspection and maintenance
- > Pipeline and cable installation, inspection and repair
- > Underwater welding and oxy-cutting operations
- > Subsea and surface non destructive testing
- > Anode installation, monitoring and replacement for structures and vessels
- > Pylon corrosion protection systems installation and maintenance
- > Vessel inspection, maintenance and repair programs
- > Moorings and navigational aids maintenance
- > Contaminated and potable water diving environments
- > Inland dams, weirs and reservoir structure inspection and maintenance
- > Seabed survey and debris removal
- > Marine salvage operations
- > Underwater video surveys and digital still photography surveys
- > Scientific diving and marine support services
- > Marine and diving support for film and documentary crews
