Matrix Composites & Engineering is a leading Australian manufacturer of critical engineered products for the offshore, subsea, mining and defence industries.

Summary

Matrix specialises in design and development of advanced polymer materials, their application in demanding

environments and their subsequent manufacture and test.

Description

Matrix Composites & Engineering is a leading Australian manufacturer of critical engineered products for the offshore, subsea, defence, mining and transport industries. Matrix specialises in the design, application and manufacture of products based on advanced composite materials, engineering plastics and elastomers.

Using proprietary polymer composite and chemical technologies, Matrix develops and manufactures a range of high performing solutions to lighten the load, maintain capability and assure delivery in complex and harsh environments.

Matrix has the capability to both design and manufacture high performance products and has established itself as a

trusted Australian partner.

Matrix is home to Australia's largest, most technically advanced composite manufacturing facility and the Southern Hemisphere's largest hyperbaric test centre.

Matrix's management systems are certified to ISO 9001 and 45001. We also boast a large research and development office run by scientists and material engineers from a broad spectrum of industry disciplines.

Matrix is an Australian based company that services the international market via a global network of agents, distributors and subsidiaries and currently exports to over 30 countries.

Industries Served

- > Defence
- > Manufacturing
- > Oil, Gas & Energy
- > Professional Services
- > Transport

Major Clients

- > AkerSolutions
- > Apache
- > Diamond Offshore
- > NOV
- > Pride Drilling
- > Santos
- > Subsea7
- > Technip
- > Thales
- > Wellstream
- > Woodside

Products & Services

- > Large Composite Structures
- > Syntactic foams
- > Long and short fibre reinforced thermosets
- > Long and short fibre reinforced thermoplastics
- > Filled Polyurethanes
- > Subsea Buoyancy
- > Bend Restrictors
- > Piggyback, Riser & Pipeline Clamps
- > Composite Centralisers
- > VIV Suppression
- > Offshore Services
- > Hyperbaric Testing

Facilities and Equipment

- > Integrated design and manufacturing capability
- > ISO 9001 Quality System
- > ISO 45001 OHS System
- > Largest composites manufacturing facility in Australia
- > Deepsea Simulation Centre (to 5,200 msw)
