We have qualified Rail Protection Officers available on level 2 status available for Rail projects in Australia. We also have machinery available to undertake slashing, spraying, weedwiping, tree spearing and mulching with qualified staff to operate them to provide vegetation control on either rail, road or power line area's. Our subcontractor has heavy equipment to remove tree's and scrub of all sizes while maintaining minimum environmental damage. For more information on our subcontractor please follow the link to his website <https://www.bioconversiontech.com>.

---

## Summary

Robbie Boyd Enterprises specialises in providing vegetation control for Australian Rail industries . Our services include supplying Vegetation control services and qualified Rail Protection Officers. We have been working for Australian Rail Track Corporation (ARTC) for the last 5 years undertaking vegetation control to ensure a safe and reliable rail network to our customers and the general public. Our Vegetation control services to clear rail tracks, roads or power lines include tgrass slashing, tree spearing and weed

spraying. We also supply qualified Rail Protection Officers for any job you need done. Our vegetation machinery consists of 2 tractors with slashers and a spray rig, and tree spearing equipment. We recently added weedwiper to our machinery collection to treat weeds while complying with the environmental protection standards. Our proven records of delivering exceptional service has led us to becoming the preferred contractor with ARTC in the North West NSW region.

---
