Essenzza Health supply a broad range of PPE products to clients in Australia and Europe. We understand how to solve supply issues without compromising quality or regulatory compliance.

## Summary

Essenzza Health was established in 2009, a division of Perth Health, a family company which has now been trading for over 35 years in West Australia.

We are able to source and secure products in a fast safe manner, with a number of products TGA ARTG listed for compliance, complete with regulatory documents and test reports.

## Description

We operate divisions in retail, wholesale and commercial with a number of in-house brands primarily in the Health and Beauty categories.

Our success is founded on the principle of exceptional customer service and our ability to meet customers demands fast, through our logistics and warehousing network in Australia, Asia and Europe.

We have extensive experience in sourcing and manufacturing products in China and our 'on the ground' experience and partnerships there allow us to secure goods fast and at competitive prices.

In the current climate the ability to source raw materials and products in a timely manner is crucial to meeting clients needs.

We use a network of shipping and air freight solutions and have vast experience in customs compliance, keeping abreast of legislation, labelling and import duties.

We are able to move fast and secure supplies for our clients and apply full due diligence with on the ground quality control inspections for orders where required. Our logistic and supply chain operates door to door ensuring goods and financial investment is safe and secure.

We are also able to utilise our large warehouse facilities in Perth WA when required with national supply chains in place.

In the current climate the requirement for PPE products is unprecedented, quantities are high and pricing is extremely volatile.

As a result specific products can vary in their supply ability and prices are changing daily as the demand for raw materials is stretching the industry to extreme levels.

As such some of the specific technical data has to be supplied separately. We also have the ability to supply a number of products not illustrated if required.

## Industries Served

- > Health
- > Retail, Trade and Other Services

---

## Major Clients

- > Chemist Warehouse

---
