360 Logistics believes its global reach is one of our main strengths with access to hundreds of agents around the world through two global networks; name Global Project Logistics Network (GPLN) and XLP Projects Network. There isn't a corner of the globe that is out of our reach.

Our Australian operations are active for project cargo to site and distribution of production from site to export, including shipping to and receiving at destination port etc. Basically a one-stop shop or anything in-between for commodities logistics.

Our services include: International and domestic transport and logistics management. Logistics strategic planning, value optimization, route surveys and feasibility studies, consolidation, warehousing and inventory management including site establishment and laydown management. Single point of contact. Total solution provider. Freight forwarding, import and export, Customs brokerage and clearance, inspection and cleaning services.

Summary

360 Logistics provides world-class global and domestic logistics, along with warehousing solutions for its clientele. Developing long-term relationships with our clients and service providers alike to support sustainable business growth. Service and quality are at the heart of 360 Logistics.

360 Logistics core focus area is outbound mine to market

logistics for the mining sector, as well as inbound project logistics services for the resources and construction sectors. Since taking on our new 9000m2 warehouse in Melbourne, we've diversified our business by entering into the food industry and currently storing food products for various clients as well as taking care their distribution.

Description

360 Logistics believes its global reach is one of our main strengths with access to hundreds of agents around the world through two global networks; name Global Project Logistics Network (GPLN) and XLP Projects Network. There isn't a corner of the globe that is out of our reach.

Our Australian operations are active for project cargo to site and distribution of production from site to export, including shipping to and receiving at destination port etc. Basically a one-stop shop or anything in-between for commodities logistics.

Our services include: International and domestic transport and logistics management. Logistics strategic planning, value optimization, route surveys and feasibility studies, consolidation, warehousing and inventory management including site establishment and laydown management. Single point of contact. Total solution provider. Freight forwarding, import and export, Customs brokerage and clearance, inspection and cleaning services. Sea, road, air and rail freight. Management and supervision, containerized and break bulk, heavy haulage, cranaage, charter and part charter, co-ordination of third party inspection and

expediting services, purchase order monitoring, demurrage management, freight tracking and reporting.

360 Logistics has adopted a non asset based business model to ensure that optimal value is delivered to its Clients.

In compliance with our quality management system, 360 Logistics carefully selects and pre-qualifies asset owning Subcontractors and manages them in accordance with Client and project drivers and in accordance with our OHS and quality standards. 360 Logistics owns project / Client specific handling equipment to the value of AU\$1.5 million.

Currently 360 Logistics have offices in Perth (WA), Brisbane (QLD) and Townsville (QLD) and 9000m2 warehouse in Melbourne. We are presently evaluating warehouse locations in Perth (WA), Brisbane (QLD) and Sydney (NSW) based upon strategic future business growth.

For more detailed information regarding 360 Logistics locations, please refer to the 360 Logistics Capability Statement.
