Shotton Group Pty Ltd is an Australian, family owned private company operating for over 40 years. It is a diverse manufacturing business with Contract engineering & manufacturing capability in light sheet metal work with associated assembly of simple to complex assemblies incorporating mechanical, hydraulic and low end electronics.

Shotton have and continue to contract for ongoing Government related work with the Rail and Bus industry, major builders on Government Hopsital and major Forensic centres, Biomedical, Correctional, mining, Innovation as well as supporting Defence and other industries.

The business focus is on diversity & development of products and doing what others call "the too hard basket". This has enabled it to develop skills not typical of a basic sheetmetal company.

Shotton Group other trading businesses include - Shotton Lifts & Shotton Parmed, well known as leaders in local short lead time manufacturing of Lifts & Mortuary storage and handling equipment.

Summary

The Shotton group is a solution-based company that is capable of taking a sheet metal concept through to delivery. The in-house engineering and design team is backed by state-of-the-art machinery including 3D printing, ATC press brakes and the Acies combination machine, (the 1st of its kind in Australia). Shotton can take your existing part and re-engineer it for manufacture by removing some of the labour-intensive processes and reducing overall cost.

The group consists of 3 divisions,
Manufacturing; servicing all the fabrication needs for all

types of projects and production runs
ParMed servicing the pathology, mortuary and funeral home industry with newly designed lifting trolley's and lab equipment
Lifts supplying the disability, commercial and residential lift market.
These divisions are all enhanced by the design and engineering department who provide, design, Engineering, Drafting, 3D printing project management and Quality document control services.

Description

Shotton Group has the following capabilities:

General metal fabrication, design, manufacture and installation, including: 3D CAD Design, Workshop Drawings, Laser Cutting, Folding, Rolling, Punching, Guillotine, Welding (Stainless Steel, Mild Steel, Aluminium), Coating (HDG, Powder Coat, Painting including custom specification paint), delivery and Installation.

Their Assembly area is purpose designed for Contract sheet metal associated assembly work. Current work includes Lift Cabins, Lift Controllers and panels, Hydraulic power packs, Biomedical equipment chassis, Bus & Rail equipment. Complete Lifts, Electric & Hydraulic Mortuary Lifters and Racking. New projects are being added all the time to this area as clients see the value of a full design, fabrication and assembly service.

PARMED Design, manufacture and Install a range of Body

Storage, Body Transport systems, Autopsy room and Forensic laboratory equipment, in addition to the PARMED range of equipment we are also the exclusive supplier of the FLEXMORT range of products and Body Bags for Emergency services.

Shotton Lifts Australia manufacture residential and commercial & disability Lifts, as well as Lifts components that are used throughout the Australian Lift Industry. The typical lead time for a lift from Shotton is 12 weeks, This is at least half the time of imported products.

They have an experienced team of engineers who have designed and developed the PARMED and Shotton Lifts range of products and bring that experience with them when working on clients projects, whether that is taking a concept from prototype to production, or enhancing existing products.

Associations

- > Australian Industry Group
- > Semma
- > Australian Elevator Association

Products & Services

- > General metal fabrication, design, manufacture and installation,
- > Design, manufacture and Install a range of Body Storage, Body Transport systems, Autopsy room and Forensic laboratory equipment,
- > Shotton Lifts Australia manufacture residential and commercial Lifts, as well as Lifts components that are used throughout the Australian Lift Industry,
- > taking a concept from prototype to production, or enhancing your current product.

Accreditations

- > ISO 9001:2015

Industries Served

- > Automotive
- > Construction & Engineering
- > Defence
- > Health
- > Manufacturing
- > Professional Services
- > Rail
- > Transport
- > Water

Facilities and Equipment

- > Acies combination machine with self feed racking
- > ACT press brake with self select tool operation
- > Laser Cutting Machines
- > 5 CNC Press brakes up to 3.6mt, with state of the art controllers
- > Various sheetmetal machinery including guillotines, shears, MIG and TIG welding stations etc. 3D Modelling software and various CAD/CAM packages Fully networked and sophisticated ERP system

Major Clients

- > BOMBARDIER
- > VOLGREN
- > LEICA BIOSYSTEMS
- > DANAHER CORPORATION
- > Marand
- > Hella
- > Hanson Yunken
- > Gold Coast Uni Hospital
- > Griffith University
- > Invocare
- > John Holland
- > Hutchinson
- > Dept of Justice Victoria
- > BIOMERIEUX USA
- > BOND UNIVERSITY
- > AUSTRALIAN CATHOLIC UNIVERSITY

Previous Significant Projects

2014
EGRP
\$500,000

Client: Steelvision

Manufacture and delivery of prison cell doors, frames and sundry equipment to the eastern goldfields prison

2013
University Of Newcastle
\$300,000

Client: Cockram

Design, manufacture and install of Mortuary Racking, autopsy table and body Lifters

2013
Townsville Hospital
\$600,000

Client: Thiess

Mortuary and Coolroom Fitout - design, manufacture and install Storage and Handling including electric body lifters, trays and racks

2013
VIFM
\$1,500,000

Client: John Holland

The complete manufacture, supply and install of the pathology and mortuary department equipment
