A Joint Venture between the Oomiak and Bronswerk groups, Oomiak Marine combines a strong and trusted presence in the Australian market with internationally renowned marine HVAC and Refrigeration systems expertise.

Summary

HVAC-R MARINE SUPPLIER, TURN KEY SYSTEM

INTEGRATOR AND OEM MANUFACTURER

Description

Oomiak Marine specialises in delivering full turn-key solutions for the defence sector, specifically surface naval and submarine fleets. Headquartered in Adelaide, the centre of Australia's maritime defence industry, we have service centres and fleet maintenance capacity in every Australian State plus a footprint in the wider APAC region.

Bronswerk's deep experience specifically within the naval sector coupled with Oomiak's strong manufacturing, installation and maintenance capability means that Oomiak Marine is strategically positioned to deliver for the country's fast-growing ship building and defence market.

We bring complete integrated HVAC-R products and support services which are engineered to withstand the most rigorous climate conditions and offer prolonged reliability. We combine world leading technical expertise with local manufacturing capacity specifically tailored to naval and defence. Our Australian based engineers, project managers and technicians use extensive local experience of working within Australia's defence sector and couple this with the technical expertise from Bronswerk's global team of engineers and designers.

Bronswerk's established product innovation means that we can deliver efficient systems that offer flexibility and adaptability. All systems are low-noise and low-vibration,

with superior pitch and roll tolerance. All of our projects also meet rigorous global quality standards.

Our local team is equipped to work with each client throughout the design, build and fit-out process and to provide ongoing maintenance support.

The Oomiak Marine team has experience of engineering solutions for military clients worldwide, including the United States, Canada, United Kingdom, France, Netherlands, Denmark, Germany, Spain, Belgium, Pakistan, Turkey, Bahamas, Thailand, Mexico, and Indonesia.

Our Services:

For defence applications, our project deliverables include:

- Heat-load analysis

- Conceptual, basic and detailed system design

- Tailored equipment design and manufacturing to meet special needs

- Procurement of components and materials

- ILS documentation

- Operator Maintenance Training

- Testing and commissioning

- System warranty

- After-sales service and spare parts (worldwide)

Industries Served

- > Clean Energy
- > Defence
- > Oil, Gas & Energy
- > Transport

Major Clients

- > BAE Systems Maritime UK
- > Naval Group
- > Thales
- > SNC Lavallin / BMT
- > Seaspan
- > French Naval Dockyard
- > Istanbul Naval Shipyard
- > Austal Ships

Products & Services

- > Conceptual, basic and detailed system design Tailored equipment design and manufacturing
- > ILS documentation
- > Operator Maintenance Training
- > After-sales service and spare parts (worldwide)
- > Chillers
- > Environmental Control Systems
- > Air Handling Units
- > Weapons Cooling System Filtration
- > Compact Refrigeration Units (CUBE)

Facilities and Equipment

- > local content manufacturing and development
