

Expression of Interest Robe Valley Sustaining Project

- Project Overview:** The Robe Valley currently produces 35 Mt/a of Channel Iron Deposit (CID) ore from operations at Mesa A Hub (25 Mt/a) and Mesa J Hub (10 Mt/a). The primary requirement of the RVS project is to sustain production at 35Mt/a from 2020 through expanded processing facilities, mine development and supporting infrastructure.
- The Project commits to ensuring local and indigenous businesses have full, fair and reasonable opportunity to supply to the Project and on this basis, contractors engaged on the Project acknowledge Rio Tinto's commitment to the employment of Aboriginal people. Contractors will be required to adopt a proactive policy with respect to the employment of Aboriginal people in connection with the Project.
- Package Title:** Site Communications Infrastructure
- Reference:** RVS/H/CC/1210
- Package Description:** Construction of radio base station (RBS) shelters, support structures and associated power and communications infrastructure.
- Specific Scope Requirements:**
- Contractors wishing to be considered must be able to demonstrate their ability to complete the following tasks;
- Design, supply, install and commissioning of 2x RBS shelters and associated towers and poles;
 - Design, supply, install and commissioning of 2x battery shelters and integration with existing RBS power systems;
 - Geotechnical, civil infrastructure and earthing works required for all sites, including interfacing with client mine operations in a brownfields environment;
 - Design, supply, installation and commissioning of telecommunications AC and DC power systems;
 - Supply, installation, testing and commissioning of fibre optic cabling and associated tray, pit and conduit networks with existing mine operations and operating plant.

Forecast Award Date: 15 December 2018

Pre-Qual Criteria: NA
