1 Project overview

ACCIONA's Engineering, Procuring & Construction (EPC) contract will deliver the first of its kind in Australia, a \$700 million project in the Kwinana Industrial Area which will process up to 400,000 tonnes a year of household waste. Using best practice technologies and processes, the facility will export an estimated 36MW of electricity back to the grid – enough to power around 50,000 homes.

2 Summary of package

Earth movements required for the Site arrangement previous to any civil and piling works. Including but not limited to excavation works in the bunker area, ponds area and gravel filling.

Scope to also include loading & management of excavated material, hauling and disposal to a stockpile on site and to a dump site.

3 Standards applicable to the Project

AS 1141.1 (set) 2015 Methods for sampling and testing aggregates, Part 1: Definitions

AS 1289.0 (set) 2014 Methods of testing soils for engineering purposes

AS 2758.1 (set) 2014 Aggregates and rock for engineering purposes - Part 1: Concrete aggregates (set)" 2016 Supplementary cementitious materials, Part 1: Fly ash

AS 3972 2010 General purpose and blended cements
