1 Project overview

ACCIÓN’s Engineering, Procuring & Construction (EPC) contract will deliver the first of its kind in Australia, a $700 million project in the Kwinana Industrial Area which will process up to 400,000 tonnes a year of household waste. Using best practice technologies and processes, the facility will export an estimated 36MW of electricity back to the grid – enough to power around 50,000 homes.

2 Summary of package

Subcontract for the remaining architectural works of the plant.

3 Standards applicable to the Project

The Technical Specifications refer to Australian and other international Standards and Codes in relation to the minimum quality requirements for materials and employed on this project.

4 Instructions

To submit an expression of interest, please complete Appendix 1, including requested appended documentation and upload to the ICN Gateway page for the project (https://gateway.icn.org.au/project/4220/kwinana-waste-to-energy-project?st=projects&psid=1542858498).
