

<b>PROJECT OVERVIEW</b>	Perdaman Chemicals and Fertilisers are developing the world's largest stream urea plant with a production capacity of 2 MTPA. The plant is located within the Burrup Strategic Industrial Area, Burrup Peninsula, approximately 10km from Dampier and 20km north-west of Karratha on the north west coastline of Western Australia. The development will utilise local natural gas for fertiliser production, using innovative and low-emissions technologies and will be Australia's first Urea Export Project generating Export Revenue of US\$ 800 Million/year. The facility will consist of a Syngas Production Block, Fertiliser Production Block and Offsite Facilities and Utilities.
<b>PACKAGE TITLE:</b>	Materials Handling Package
<b>PACKAGE NO:</b>	N/A
<b>SCOPE:</b>	<p>Design, procurement and supply of materials handling equipment capable of transporting urea from the plant to the port facility, approximately 3 km, at approx. 2,200 tph, and loading onto a Panamax bulk carrier. The package consists of:</p> <ul style="list-style-type: none"> <li>• In plant conveyors and in loading to plant storage stockpile</li> <li>• Product reclaim system at plant storage</li> <li>• Overland conveying system to port storage, including transfers</li> <li>• Product reclaim system at port storage</li> <li>• Transfer conveyors to feed ship loader</li> <li>• Ship loading system</li> </ul> <p>Note that all electrical, instrumentation, motors, piping, control systems and MCCs are to be included.</p>
