

<b>PROJECT OVERVIEW</b>	Perdaman Chemicals and Fertilisers are focused on the development of the world’s largest stream urea plant with a production capacity of 2 MTPA. The plant is located within the Burrup Strategic Industrial Area, Burrup Peninsula, approximately 10km from Dampier and 20km north-west of Karratha on the north west coastline of Western Australia. The development will utilise local natural gas for fertiliser production, using innovative and low-emissions technologies and will be Australia’s first Urea Export Project generating Export Revenue of US\$ 800 Million/year. The facility will consist of a Syngas Production Block, Fertiliser Production Block and Offsite Facilities and Utilities.
<b>PACKAGE TITLE:</b>	Supply, testing, commissioning and delivery of Pre-fabricated Substation including 33kV GIS, 6.6kV & 400V Switchgears and VFDs
<b>PACKAGE NO:</b>	7140
<b>SCOPE:</b>	<p>The design, manufacture, factory testing, supply and delivery to site installation and commissioning support of Prefabricated High Voltage (HV) modular type, blast resistant Substation.</p> <p>Substation consist of various switchrooms equipped with 33kV GIS switchgear, 6.6kV and 400V Switchgears and Motor Control Centers, LV and HV Variable Frequency Drives, LV Distribution Switchboards in a single or multiple transportable units, ready for operation after being fixed in position relevant concrete foundation and connected to the power system.</p> <p>Substation concrete foundation will be installed by others, installation, testing and commissioning and connection of all multiple units will be part of this contract.</p>
