### PROJECT OVERVIEW

Perdaman Chemicals and Fertilisers are focused on the development of the world’s largest stream urea plant with a production capacity of 2 MTPA. The plant is located within the Burrup Strategic Industrial Area, Burrup Peninsula, approximately 10km from Dampier and 20km north-west of Karratha on the north west coastline of Western Australia. The development will utilise local natural gas for fertiliser production, using innovative and low-emissions technologies and will be Australia’s first Urea Export Project generating Export Revenue of US$ 800 Million/year. The facility will consist of a Syngas Production Block, Fertiliser Production Block and Offsite Facilities and Utilities.

### PACKAGE TITLE:

Supply, testing, commissioning and delivery of Pre-fabricated Substation including 33kV GIS, 6.6kV & 400V Switchgears and VFDs

### PACKAGE NO:

7140

### SCOPE:

The design, manufacture, factory testing, supply and delivery to site installation and commissioning support of Prefabricated High Voltage (HV) modular type, blast resistant Substation.

Substation consist of various switchrooms equipped with 33kV GIS switchgear, 6.6kV and 400V Switchgears and Motor Control Centers, LV and HV Variable Frequency Drives, LV Distribution Switchboards in a single or multiple transportable units, ready for operation after being fixed in position relevant concrete foundation and connected to the power system.

Substation concrete foundation will be installed by others, installation, testing and commissioning and connection of all multiple units will be part of this contract.
