

<b>PROJECT OVERVIEW</b>	Perdaman Chemicals and Fertilisers are focused on the development of the world's largest stream urea plant with a production capacity of 2 MTPA. The plant is located within the Burrup Strategic Industrial Area, Burrup Peninsula, approximately 10km from Dampier and 20km north-west of Karratha on the north west coastline of Western Australia. The development will utilise local natural gas for fertiliser production, using innovative and low-emissions technologies and will be Australia's first Urea Export Project generating Export Revenue of US\$ 800 Million/year. The facility will consist of a Syngas Production Block, Fertiliser Production Block and Offsite Facilities and Utilities.
<b>PACKAGE TITLE:</b>	Ammonia Pumps
<b>PACKAGE NO:</b>	P5411
<b>SCOPE:</b>	<ol style="list-style-type: none"> <li>1) Four (4) HP Ammonia Pumps, Centrifugal Horizontal Multistage electric motor driven API 610 Pumps, 131 m<sup>3</sup>/h at 2380m head, estimated pump rated power 850 kW and 12% Chrome material of construction, completed with electric motor, double mechanical seal system, coupling, common baseplate for pump and motor, lube oil system (if required) and all instrumentation required for safe operation of the unit.</li> <li>2) Four (4) HP Carbamate Pumps, Centrifugal Horizontal Multistage electric Motor driven API 610 Pumps, 137 m<sup>3</sup>/h at 1100m head, estimated pump rated power 810 kW and duplex stainless steel material of construction, completed with electric motor, double mechanical seal system, coupling, common baseplate for pump and motor, lube oil system (if required) and all instrumentation required for safe operation of the unit</li> </ol>
