

<b>PROJECT OVERVIEW</b>	Perdaman Chemicals and Fertilisers are focused on the development of the world's largest stream urea plant with a production capacity of 2 MTPA. The plant is located within the Burrup Strategic Industrial Area, Burrup Peninsula, approximately 10km from Dampier and 20km north-west of Karratha on the north west coastline of Western Australia. The development will utilise local natural gas for fertiliser production, using innovative and low-emissions technologies and will be Australia's first Urea Export Project generating Export Revenue of US\$ 800 Million/year. The facility will consist of a Syngas Production Block, Fertiliser Production Block and Offsite Facilities and Utilities.
<b>PACKAGE TITLE:</b>	COOLING TOWERS
<b>PACKAGE NO:</b>	P5431
<b>SCOPE:</b>	The cooling tower package will include modular cell induced draft flow GRP cooling towers for design water flow rate of 51,561m <sup>3</sup> /h to provide cooling for seawater from 45C to 35C. A maximum of 3100 m <sup>3</sup> /h of sea water will be available.
