

PROJECT OVERVIEW	Perdaman Chemicals and Fertilisers are focused on the development of the world’s largest stream urea plant with a production capacity of 2 MTPA. The plant is located within the Burrup Strategic Industrial Area, Burrup Peninsula, approximately 10km from Dampier and 20km north-west of Karratha on the north west coastline of Western Australia. The development will utilise local natural gas for fertiliser production, using innovative and low-emissions technologies and will be Australia’s first Urea Export Project generating Export Revenue of US\$ 800 Million/year. The facility will consist of a Syngas Production Block, Fertiliser Production Block and Offsite Facilities and Utilities.
PACKAGE TITLE:	Non Process Buildings – Chemical Storage, Warehouse & Maintenance Buildings
PACKAGE NO:	
SCOPE:	<p>The Urea plant will require non-process infrastructure including:</p> <ul style="list-style-type: none"> • the Chemical Storage with appropriate ventilation (approx. 40 x 40m storage building with a 20 x 40m open storage yard) inclusive of toilets, kitchen and office facilities. • Warehouse (44 x 41.5m Warehouse building with 25 x 41.5m open storage area) inclusive of toilets, lunchroom and storage rooms. • Maintenance building (51.6 x 52.5m) complete with toilets, lunchroom, offices and storerooms. Work includes the supply and installation of a 10 ton overhead travelling crane. <p>The scope of work will include the following main activities:</p> <ul style="list-style-type: none"> • Design and construction of these buildings. Indicative layouts are to be assessed and improved by the Subcontractor. • The buildings are to be completed on a “turnkey” basis and include the following: <ul style="list-style-type: none"> ○ Design, fabrication, transport and assembly on site ○ Building services works including (but limited to) internal and external architectural finishes, fire systems and other essential building works ○ Supply and installation of mechanical equipment including HVAC to all offices and lunchrooms. ○ Hydraulic works including water, drainage and waste water treatment ○ All electrical considerations ○ All telecommunication and networking infrastructure • Civil works associated with footings and ground slabs will be completed by others.
