

PROJECT OVERVIEW	Perdaman Chemicals and Fertilisers are focused on the development of the world's largest stream urea plant with a production capacity of 2 MTPA. The plant is located within the Burrup Strategic Industrial Area, Burrup Peninsula, approximately 10km from Dampier and 20km north-west of Karratha on the north west coastline of Western Australia. The development will utilise local natural gas for fertiliser production, using innovative and low-emissions technologies and will be Australia's first Urea Export Project generating Export Revenue of US\$ 800 Million/year. The facility will consist of a Syngas Production Block, Fertiliser Production Block and Offsite Facilities and Utilities.
PACKAGE TITLE:	CS Seam and Seamless CS Pipe
PACKAGE NO:	P6110
SCOPE:	<p>Scope of this package comprises of all Carbon Steel Pipe, required for the Process and Utility Services.</p> <p>All piping shall be fabricated in compliance with the indicated ASTM and API standards for furnishing, permissible fabrication variations and minimum testing requirements.</p> <p>The scope covers fabrication of;</p> <ul style="list-style-type: none"> <i>*Seamless and Welded pipe</i> <i>*Low Temperature Carbon Steel pipe for Critical NH₃ services</i> <i>*Critical Services (SynGas) piping subject to (HTHA), API 941</i> <i>*High Temperature/Pressure (ASME CL600 and above) rated piping.</i>
