### PROJECT OVERVIEW

Perdaman Chemicals and Fertilisers are focused on the development of the world’s largest stream urea plant with a production capacity of 2 MTPA. The plant is located within the Burrup Strategic Industrial Area, Burrup Peninsula, approximately 10km from Dampier and 20km north-west of Karratha on the north west coastline of Western Australia. The development will utilise local natural gas for fertiliser production, using innovative and low-emissions technologies and will be Australia’s first Urea Export Project generating Export Revenue of US$ 800 Million/year. The facility will consist of a Syngas Production Block, Fertiliser Production Block and Offsite Facilities and Utilities.

### PACKAGE TITLE:
CS Seam and Seamless CS Pipe

### PACKAGE NO:
P6110

### SCOPE:
Scope of this package comprises of all Carbon Steel Pipe, required for the Process and Utility Services.

All piping shall be fabricated in compliance with the indicated ASTM and API standards for furnishing, permissible fabrication variations and minimum testing requirements.

The scope covers fabrication of;

* Seamless and Welded pipe
* Low Temperature Carbon Steel pipe for Critical NH₃ services
* Critical Services (SynGas) piping subject to (HTHA), API 941
* High Temperature/Pressure (ASME CL600 and above) rated piping.
