**PROJECT OVERVIEW**

Perdaman Chemicals and Fertilisers are focused on the development of the world’s largest stream urea plant with a production capacity of 2 MTPA. The plant is located within the Burrup Strategic Industrial Area, Burrup Peninsula, approximately 10km from Dampier and 20km north-west of Karratha on the north west coastline of Western Australia. The development will utilise local natural gas for fertiliser production, using innovative and low-emissions technologies and will be Australia’s first Urea Export Project generating Export Revenue of US$ 800 Million/year. The facility will consist of a Syngas Production Block, Fertiliser Production Block and Offsite Facilities and Utilities.

**PACKAGE TITLE:** Urea Storage Buildings

**PACKAGE NO:** T1002

**SCOPE:**

The Urea plant will require the following storage building for urea:

- Urea storage building in process plant
- Urea storage building near Dampier Port

The scope of work will include the following main activities:

- Design and construction of storage sheds. Indicative structural arrangement to be assessed and improved by the Subcontractor.
- The buildings are to be completed on a “turnkey” basis and include the following:
  - Design, fabrication, transport and assembly on site
  - Structural framing and cladding (including doors and shutters)
  - Stairwells and walkways in the buildings
  - Building services works including (but limited to) internal and external architectural finishes, fire systems and other essential building works
  - Hydraulic works including water and drainage
  - Lifting devices such as monorails
  - All lighting and electrical fittings
  - All telecommunication and networking infrastructure
- Civil works associated with footings and ground slabs will be completed by others.
