

PROJECT OVERVIEW	Perdaman Chemicals and Fertilisers are focused on the development of the world's largest stream urea plant with a production capacity of 2 MTPA. The plant is located within the Burrup Strategic Industrial Area, Burrup Peninsula, approximately 10km from Dampier and 20km north-west of Karratha on the north west coastline of Western Australia. The development will utilise local natural gas for fertiliser production, using innovative and low-emissions technologies and will be Australia's first Urea Export Project generating Export Revenue of US\$ 800 Million/year. The facility will consist of a Syngas Production Block, Fertiliser Production Block and Offsite Facilities and Utilities.
PACKAGE TITLE:	Grounding System
PACKAGE NO:	P7136
SCOPE:	<p>Scope for the package comprises the Grounding system for the Urea Plant.</p> <p>The supplier is expected to design, manufacture, shop testing and delivery of the Grounding system meeting the requirements of the relevant Australian standards for this project:</p> <p>The scope covers;</p> <ul style="list-style-type: none"> *Grounding well with cover and copper plate *Grounding Rods *Copper busbars *Air Terminals *Compression Type Connectors *Grounding wire bare and insulated
