

PROJECT OVERVIEW	Perdaman Chemicals and Fertilisers are focused on the development of the world's largest stream urea plant with a production capacity of 2 MTPA. The plant is located within the Burrup Strategic Industrial Area, Burrup Peninsula, approximately 10km from Dampier and 20km north-west of Karratha on the north west coastline of Western Australia. The development will utilise local natural gas for fertiliser production, using innovative and low-emissions technologies and will be Australia's first Urea Export Project generating Export Revenue of US\$ 800 Million/year. The facility will consist of a Syngas Production Block, Fertiliser Production Block and Offsite Facilities and Utilities.
PACKAGE TITLE:	Lighting System
PACKAGE NO:	P7700
SCOPE:	<p>Scope for the package comprises the Lightning system for the Urea Plant.</p> <p>The supplier is expected to design, manufacture, shop testing and delivery of the lighting system and distribution boards meeting the requirements of the relevant Australian standards for this project:</p> <p>The scope covers;</p> <ul style="list-style-type: none"> <i>*Lighting Fixtures in the process and utility Areas</i> <i>*Indoor and Street Lighting including Light Poles</i> <i>*Aircraft Obstruction Lighting</i> <i>*Emergency Lighting</i> <i>*GPO's, Convenience Receptacles and Tumbler Switches</i> <i>*Lighting Junction Boxes</i> <i>*Lighting and Power Distribution Switchboards</i>
