

PROJECT OVERVIEW	Perdaman Chemicals and Fertilisers are focused on the development of the world's largest stream urea plant with a production capacity of 2 MTPA. The plant is located within the Burrup Strategic Industrial Area, Burrup Peninsula, approximately 10km from Dampier and 20km north-west of Karratha on the north west coastline of Western Australia. The development will utilise local natural gas for fertiliser production, using innovative and low-emissions technologies and will be Australia's first Urea Export Project generating Export Revenue of US\$ 800 Million/year. The facility will consist of a Syngas Production Block, Fertiliser Production Block and Offsite Facilities and Utilities.
PACKAGE TITLE:	Cathodic Protection System
PACKAGE NO:	P7892
SCOPE:	<p>Scope for the package comprises the Cathodic Protection System for the Urea Plant.</p> <p>The supplier is expected to provide all labour, engineering services, supervision, material, consumables and other incidentals necessary to design and supply of the Cathodic Protection System meeting the requirements of the relevant Australian standards for this project</p> <p>The scope covers;</p> <ul style="list-style-type: none"> *Cathodic Protection for the Underground Piping *Cathodic Protection for the Ammonia Tank Bottom External
