

PROJECT OVERVIEW	Perdaman Chemicals and Fertilisers are focused on the development of the world's largest stream urea plant with a production capacity of 2 MTPA. The plant is located within the Burrup Strategic Industrial Area, Burrup Peninsula, approximately 10km from Dampier and 20km north-west of Karratha on the north west coastline of Western Australia. The development will utilise local natural gas for fertiliser production, using innovative and low-emissions technologies and will be Australia's first Urea Export Project generating Export Revenue of US\$ 800 Million/year. The facility will consist of a Syngas Production Block, Fertiliser Production Block and Offsite Facilities and Utilities.
PACKAGE TITLE:	Instrumentation – Prefabricated Analysers House and Field Mounted Analyzer System
PACKAGE NO:	P8511
SCOPE:	<p>Scope for the package comprises of Supply of Analyzer System associated with the Urea Plant.</p> <p>The supplier is expected to provide all labour, engineering services, supervision, equipment, material, consumables and other incidentals necessary to design, fabricate, paint, assemble, inspect and test.</p> <p>The scope covers supply of; <i>*Prefabricated Analysers House for the Ammonia and Urea Units</i> <i>*Field Mounted Analyser Systems including Sampling System (Infrared Absorption, Thermal Conductivity, UV Absorption, ZIO Probe)</i></p>
