

PROJECT OVERVIEW	Perdaman Chemicals and Fertilisers are focused on the development of the world's largest stream urea plant with a production capacity of 2 MTPA. The plant is located within the Burrup Strategic Industrial Area, Burrup Peninsula, approximately 10km from Dampier and 20km north-west of Karratha on the north west coastline of Western Australia. The development will utilise local natural gas for fertiliser production, using innovative and low-emissions technologies and will be Australia's first Urea Export Project generating Export Revenue of US\$ 800 Million/year. The facility will consist of a Syngas Production Block, Fertiliser Production Block and Offsite Facilities and Utilities.
PACKAGE TITLE:	GRP/FRP Piping
PACKAGE NO:	P6F11
SCOPE:	<p>Scope of this package comprises of all GRP/FRP Piping required for the Urea Process Plant.</p> <p>The GRP (Filament Wound) piping shall be ASME class 150 and in the size range up to DN2000. These pipes are typically used for the Seawater Supply and Return services.</p>
