

PROJECT OVERVIEW	Perdaman Chemicals and Fertilisers are focused on the development of the world's largest stream urea plant with a production capacity of 2 MTPA. The plant is located within the Burrup Strategic Industrial Area, Burrup Peninsula, approximately 10km from Dampier and 20km north-west of Karratha on the north west coastline of Western Australia. The development will utilise local natural gas for fertiliser production, using innovative and low-emissions technologies and will be Australia's first Urea Export Project generating Export Revenue of US\$ 800 Million/year. The facility will consist of a Syngas Production Block, Fertiliser Production Block and Offsite Facilities and Utilities.
PACKAGE TITLE:	Pipe Supports – Engineered
PACKAGE NO:	P6Y70
SCOPE:	<p>Scope of this package comprises various types of engineered Pipe Supports required for the Urea Plant.</p> <p>Ensure all piping supports is classified to ASTM standards unless specifically noted otherwise. Supply only new materials, free from defects impairing strength, durability or appearance and conforming to specifications outlined in (MSS) Practice SP-58.</p> <p>The scope covers fabrication of:</p> <ul style="list-style-type: none"> *Standard Pipe Supports *Cryogenic Pipe Supports *FRP/GRE Pipe Supports *Special Pipe Supports *Spring Supports *Supports for Multiple Lines
