

PROJECT OVERVIEW	Perdaman Chemicals and Fertilisers are focused on the development of the world's largest stream urea plant with a production capacity of 2 MTPA. The plant is located within the Burrup Strategic Industrial Area, Burrup Peninsula, approximately 10km from Dampier and 20km north-west of Karratha on the north west coastline of Western Australia. The development will utilise local natural gas for fertiliser production, using innovative and low-emissions technologies and will be Australia's first Urea Export Project generating Export Revenue of US\$ 800 Million/year. The facility will consist of a Syngas Production Block, Fertiliser Production Block and Offsite Facilities and Utilities.
PACKAGE TITLE:	Manual Valves
PACKAGE NO:	P6150
SCOPE:	<p>Scope of this package comprises various types of Valves required for the Urea Plant.</p> <p>Ensure all valves meet ASME B16.34 design and API 598 tests requirement as a minimum. The supplier is expected to provide all labour, engineering services, supervision, equipment, material, consumables and other incidentals necessary to design, fabricate, paint, assemble, inspect, and test valves.</p> <p>The scope covers supply of:</p> <ul style="list-style-type: none"> <i>*Butterfly valves and dual plate check valves in hydrocarbon and Ammonia service</i> <i>*Gate and Globe valves</i> <i>*Ball Valves and Soft seated valves</i>
