

PROJECT OVERVIEW	Perdaman Chemicals and Fertilisers are focused on the development of the world's largest stream urea plant with a production capacity of 2 MTPA. The plant is located within the Burrup Strategic Industrial Area, Burrup Peninsula, approximately 10km from Dampier and 20km north-west of Karratha on the north west coastline of Western Australia. The development will utilise local natural gas for fertiliser production, using innovative and low-emissions technologies and will be Australia's first Urea Export Project generating Export Revenue of US\$ 800 Million/year. The facility will consist of a Syngas Production Block, Fertiliser Production Block and Offsite Facilities and Utilities.
PACKAGE TITLE:	Fired Heaters
PACKAGE NO:	P5351
SCOPE:	<p>Provide all labour, supervision, equipment, materials, consumables and other incidentals necessary to design, fabricate, assemble, inspect, paint and test the Fired Heaters Units.</p> <p>The fired heater units shall be equipped with forced draught burners capable of firing the full range of off gas from nitrogen wash, off gas from ammonia refrigeration, flash gas, excess synthesis gas and natural gas or any combination of these.</p>
