

Project Overview:	Perdaman Chemicals and Fertilisers are focused on the development of the world's largest stream urea plant with a production capacity of 2 MTPA. The plant is located within the Burrup Strategic Industrial Area, Burrup Peninsula, approximately 10km from Dampier and 20km north-west of Karratha on the north west coastline of Western Australia. The development will utilise local natural gas for fertiliser production, using innovative and low-emissions technologies and will be Australia's first Urea Export Project generating Export Revenue of US\$ 800 Million/year. The facility will consist of a Syngas Production Block, Fertiliser Production Block and Offsite Facilities and Utilities.
Package Title:	Waste Management
Package No.:	S9433
Scope:	SNC Lavalin seeks expressions of interest for site based Waste Management services, inclusive of; <ul style="list-style-type: none"> - Collection and Removal of Construction Waste; - Collection and Removal of Office and Camp Waste; and - Collection and Removal of Contaminated Waste
