

Project Overview:	Perdaman Chemicals and Fertilisers are focused on the development of the world's largest stream urea plant with a production capacity of 2 MTPA. The plant is located within the Burrup Strategic Industrial Area, Burrup Peninsula, approximately 10km from Dampier and 20km north-west of Karratha on the north west coastline of Western Australia. The development will utilise local natural gas for fertiliser production, using innovative and low-emissions technologies and will be Australia's first Urea Export Project generating Export Revenue of US\$ 800 Million/year. The facility will consist of a Syngas Production Block, Fertiliser Production Block and Offsite Facilities and Utilities.
Package Title:	Temporary Facilities - Service and Maintenance
Package No.:	S9463
Scope:	<p>SNC Lavalin seeks expressions of interest from service providers capable of providing Service and Maintenance of temporary facilities, the Scope of service will include;</p> <ul style="list-style-type: none"> - Site based cleaning of all temporary buildings (office, crib and ablution facilities); - Cleaning and servicing of Air-conditioning.
