

PROJECT OVERVIEW	Perdaman Chemicals and Fertilisers are focused on the development of the world’s largest stream urea plant with a production capacity of 2 MTPA. The plant is located within the Burrup Strategic Industrial Area, Burrup Peninsula, approximately 10km from Dampier and 20km north-west of Karratha on the north west coastline of Western Australia. The development will utilise local natural gas for fertiliser production, using innovative and low-emissions technologies and will be Australia’s first Urea Export Project generating Export Revenue of US\$ 800 Million/year. The facility will consist of a Syngas Production Block, Fertiliser Production Block and Offsite Facilities and Utilities.
PACKAGE TITLE:	Earthworks
PACKAGE NO:	TBA
SCOPE:	<p>The Urea plant will require bulk earthworks to be undertaken to provide a level area and roadworks for subsequent construction of the main plant.</p> <p>The scope of work will include the following main activities:</p> <ul style="list-style-type: none"> • Clearing and grubbing of the plant areas, access roads and laydown areas • Stripping of the top soil and subsequent stockpiling for subsequent use in landscaping activities • Bulk excavation in a cut to fill operation • Import of any additional fill materials to meet any shortfall • Construction of access roads to provide access for the earthworks and subsequent plant construction. • Construction of the permanent road network as shown in the drawings including cutting of swale and installation of the permanent culverts for the management of stormwater. The work under this scope includes subgrade preparation, supply and construction of subbase and base course. Final surfacing will be by others. • Provision of all construction water to meet the requirements of compaction as specified and for dust control during the works. <p>This subcontract is construct only with the Subcontractor responsible for any temporary works design required to undertake the works.</p>
