

<p>Project Overview:</p>	<p>Perdaman Chemicals and Fertilisers are focused on the development of the world's largest stream urea plant with a production capacity of 2 MTPA. The plant is located within the Burrup Strategic Industrial Area, Burrup Peninsula, approximately 10km from Dampier and 20km north-west of Karratha on the north west coastline of Western Australia. The development will utilise local natural gas for fertiliser production, using innovative and low-emissions technologies and will be Australia's first Urea Export Project generating Export Revenue of US\$ 800 Million/year. The facility will consist of a Syngas Production Block, Fertiliser Production Block and Offsite Facilities and Utilities.</p>
<p>Package Title:</p>	<p>Fire Fighting Equipment</p>
<p>Package No.:</p>	<p>P5830</p>
<p>Scope:</p>	<p>Fire Fighting Equipment are provided all around the Perdaman Chemicals and Fertilisers Plant as a means of active fire protection system to mitigate the fire hazard scenarios. These fire fighting equipment are designed considering the hazard and the in compliance with relevant Australian standards, other International standards and local standards.</p> <p>The fire fighting equipment includes the hydrant, hydrant mounted monitors, fire monitors, hose cabinets, extinguishers and deluge water spray system as minimum. The vendor shall be responsible for design, engineering, material procurement, installation, commissioning, inspection and testing. The vendor shall also provide all labour, supervision, equipment, materials, consumables and other incidentals necessary to design, fabricate, paint, assemble, inspect, and test of the fire fighting equipment.</p>
