

<p><b>Project Overview:</b></p>	<p>Perdaman Chemicals and Fertilisers are focused on the development of the world's largest stream urea plant with a production capacity of 2 MTPA. The plant is located within the Burrup Strategic Industrial Area, Burrup Peninsula, approximately 10km from Dampier and 20km north-west of Karratha on the north west coastline of Western Australia. The development will utilise local natural gas for fertiliser production, using innovative and low-emissions technologies and will be Australia's first Urea Export Project generating Export Revenue of US\$ 800 Million/year. The facility will consist of a Syngas Production Block, Fertiliser Production Block and Offsite Facilities and Utilities.</p>
<p><b>Package Title:</b></p>	<p>S5001</p>
<p><b>Package No.:</b></p>	<p>Piperack Modules</p>
<p><b>Scope:</b></p>	<p>Detailed design, supply and fabrication of Pre-Assembled Racks (PARs) including structural steel, walkways, handrails, ladders, piping complete with painting and isolation, lighting and junction boxes.          Approximately 60 PARs are envisaged, with the largest being 36m long x 10m wide x 24m high with a shipping weight of 400-500MT.          Structural steel will be Australian Steel Rolled Sections (Grade 300 to AS 3679.1), painted in accordance with project specifications.          Structural design shall be suitable for Cyclone Cat V according to Australian Bureau of Meteorology and suitable for sea transportation.          Electrical design will be to AS/NZS 3000 and installations in hazardous areas shall comply with AS 60079. Hazardous area equipment need to certified by accredited inspectors prior to shipping.</p>
