

<p>Project Overview:</p>	<p>Perdaman Chemicals and Fertilisers are focused on the development of the world's largest steam urea plant with a production capacity of 2 MTPA. The plant is located within the Burrup Strategic Industrial Area, Burrup Peninsula, approximately 10km from Dampier and 20km north-west of Karratha on the north west coastline of Western Australia. The development will utilise local natural gas for fertiliser production, using innovative and low-emissions technologies and will be Australia's first Urea Export Project generating Export Revenue of US\$ 800 Million/year. The facility will consist of a Syngas Production Block, Fertiliser Production Block and Offsite Facilities and Utilities.</p>
<p>Package Title:</p>	<p>Speciality Items - Filters, Strainers</p>
<p>Package No.:</p>	<p>P5624</p>
<p>Scope:</p>	<p>Strainers are used in a piping network to trap dirt and any foreign matter such as weld splatter etc. from going into sensitive equipment such as a pump, compressor, turbine etc.</p> <p>Strainers shall be designed to ASME B16.34 / ASME Section – VIII. Div. 1 standards with a superior wall thickness for corrosion allowance and shall be provided with a large screen open area ensures an efficient filtering action with a low pressure drop.</p> <p>Vendor shall be responsible of the design , construction and fabrication of the strainers in compliance with the standard and shall be suitable for the process conditions specified in the project design basis and applicable datasheets,</p> <p>Vendor shall guarantee the performance of the Strainers and take full responsibility for safe and trouble free operations.</p>
