

<b>Project Overview:</b>	Perdaman Chemicals and Fertilisers are focused on the development of the world's largest stream urea plant with a production capacity of 2 MTPA. The plant is located within the Burrup Strategic Industrial Area, Burrup Peninsula, approximately 10km from Dampier and 20km north-west of Karratha on the north west coastline of Western Australia. The development will utilise local natural gas for fertiliser production, using innovative and low-emissions technologies and will be Australia's first Urea Export Project generating Export Revenue of US\$ 800 Million/year. The facility will consist of a Syngas Production Block, Fertiliser Production Block and Offsite Facilities and Utilities.
<b>Package Title:</b>	Coated Pipe and Fittings
<b>Package No.:</b>	P6114
<b>Scope:</b>	<p>Piping coating is one of the consistent solution for protecting pipes and fittings from corrosion, from moisture, other harmful chemicals</p> <p>The coating provides pipelines with a constant protective layer that shield the pipes from any damaging effects of corrosion.</p> <p>The pipes and fittings shall be coated in a fully equipped coating plant and brought to site for laying.</p> <p>Vendor shall guarantee the materials brands offered for coating (i.e. epoxy powder, co-polymer adhesive and the polyethylene compound) shall have proven compatibility and shall support the same with compatibility certificates from manufacturers in this regard.</p> <p>Vendor shall be responsible and guarantee the performance of the Coating for the design conditions as specified in the applicable project specifications and project design basis and shall take full responsibility for safe and trouble free operations of the coating system</p>
