

Anglo American – Aquila Project  
Expression of Interest (EOI)  
**CC002 - Surface Conveyor (Supply)**

### **General Description**

The objective of the Aquila Project (the Project) is to convert the previous Aquila bord and pillar mine, located at the Capcoal mining complex in Central Queensland's Bowen Basin, to a longwall operation.

The scope of the Project includes:

- Modification of existing Grasstree development system to support longwall operations;
- Modification of existing Grasstree mobile equipment fleet;
- Removal, modification and replacement of existing underground conveyor system;
- Construction of a surface material handling system; and
- Limited upgrade to the site services, including electrical, controls and water systems to support the new longwall operations.

### **Expressions of Interest**

Anglo American encourages local businesses interested in Surface Conveyor to register an expression of interest (EOI) through the ICN Gateway webpage.

### **Specific Scope Requirements**

The scope of work may include:

- Design and supply of a conveyor belt from the portal to underground operations to the Grasstree ROM
- Included in the conveyor is the delivery chute, conveyor drive, tensioning loop, control switchgear, return end, conveyor structure and conveyor belting
- Design and supply of trestle supporting structure for the conveyor where crossing the open pit

**Forecast Award Date:** Q2 2020

**Delivery Schedule:** It is anticipated that these works will commence Q3 2020

### **Disclaimer**

The scope of work is indicative only and is intended to be used as a summary description of work which may be required by Anglo American and may be subject to change. Full scopes of work will be made available to parties that are invited to tender. There is no undertaking to contract or proceed to a competitive process implied by this form. Further contact with interested suppliers will be at Anglo American's discretion.
