

Industry Capability Network (ICN)

- National network
- NSW Government-funded not-for-profit company
- Provide services that enable major projects to maximize local and Indigenous industry participation i.e. make it easier for buyers to find suppliers & *vice versa*
- “Business match-making service”
- ICN also applies the experience and contacts of individual team members to assist industry - e.g. Aboriginal engagement, participation in local government procurement project, defence industry collaborations, provide input about industry capacity in planning activities

Service Offering

Buyers:

What do we do:

- Assist the buyer to identify capable local, Indigenous and social enterprises.

How do we do it:

- ICN Gateway project web pages and communication of project information/ supply opportunities
- Supply chain mapping
- Supplier briefings

Suppliers:

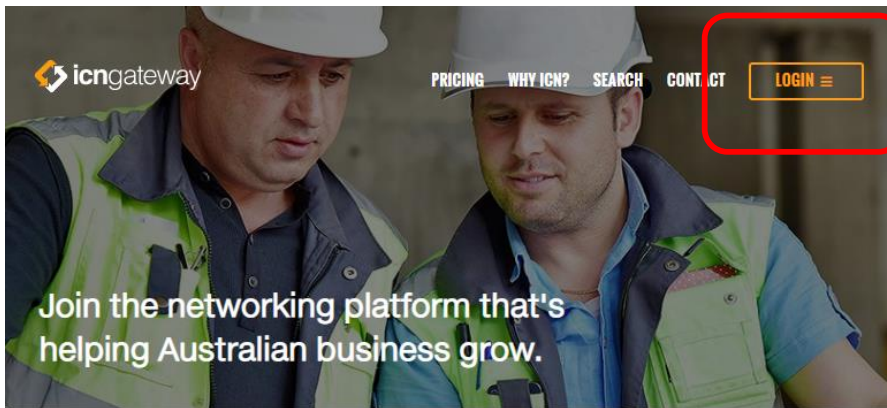

What do we do:

- Inform suppliers about projects and how to position themselves for supply opportunities.

How do we do it:

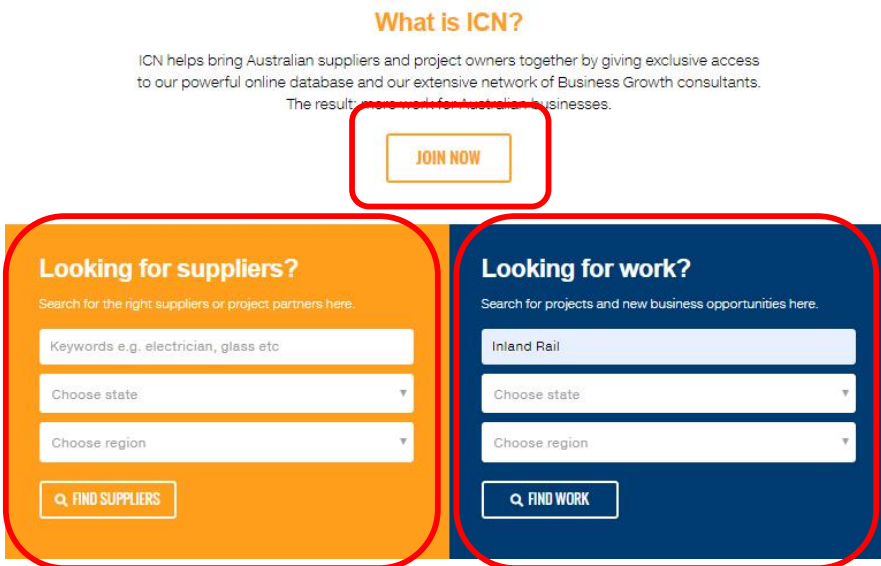

- Support businesses to create company profiles and register interest against supply opportunities on ICN Gateway.

ICN Gateway

URL: <https://gateway.icn.org.au>

- Web portal for buyers and suppliers
- Suppliers create and manage a company profile (CV)
- Buyers communicate project information and supply opportunities.
- Suppliers register their interest for supply opportunities (EOI)
- ICN evaluates responses and provides supplier information to buyer.

Company Profiles - Subscriptions

Inland Rail - Narrabri to North Star (N2NS) Separable Portion 1

Locations:	NSW Australia
Project Value:	>\$400M
Project Status:	Procurement-phase
Project Owner:	AUSTRALIAN RAIL TRACK CORPORATION LTD

Project Details

Inland Rail

Inland Rail is the missing link in Australia's national supply chain. It will complete the backbone of the national freight network by providing transit times of less than 24 hours for freight trains between Melbourne and Brisbane via regional Victoria, New South Wales and Queensland.

The Australian Government selected the Australian Rail Track Corporation (ARTC) to deliver Inland Rail, in partnership with the private sector.

Comprising 13 projects and spanning 1,700km from Melbourne to Brisbane, Inland Rail will transform how we move goods around our vast country, creating more opportunities for regions to connect to cities and businesses to markets.

Narrabri to North Star Project

The Narrabri to North Star (N2NS) section involves an upgrade to approximately 185km of track within the existing rail corridor and construction of approximately 2.3km of a new rail corridor.

The works are required to accommodate the operation of 1,800m-long double-stacked freight trains. This project crosses the three Local Government Areas of Gwydir, Narrabri and Moree Plains.

The works are divided into two packages:

- 2600-0018 N2NS SP1 Works Package (Called 'SP1')
- 2600-0019 N2NS SP2 Structures Package (Called 'SP2')

For more information on the N2NS project visit <https://inlandrail.artc.com.au/N2NS>.

The alignment (pertaining to SP1)

N2NS SP1 is a brownfield section and involves upgrading works within the existing ARTC rail corridor.

Key features include:

- upgrading approximately 171km of track and formation within the existing rail corridor
- constructing two new road over rail bridges at Moree (Jones Ave) and Bellata (Newell Highway)
- constructing 5 new crossing loops with associated maintenance sidings
