

CHEVRON AUSTRALIA

Thevenard Island Retirement (TVIR)

TITLE: Offshore Platform Removal (U-41613)

DESCRIPTION: Chevron Australia is seeking expressions of interest from service providers able to provide offshore platform removal, transport, dismantling and disposal services in support of the Thevenard Island Retirement Project.

Service providers shall provide vessels, equipment and personnel to assist Chevron Australia to cut, lift, remove, transport and dispose nine offshore platforms (6 monopods and 3 tripods). Water depths range from 7.0m to 16.0m at lowest astronomical tide.

Scope of work includes (but not limited to):

1. Project management and engineering;
2. Supply of vessels, equipment and personnel to perform the works;
3. Perform subsea cutting and lifting to remove platforms and well conductors to seabed or a specified height above seabed;
4. Placing specified platform sections or other structures on seabed;
5. Segregation of waste including waste fluids, marine growth and recyclables for disposal on the mainland;
6. Transport for all equipment, waste, consumables, and supplies to and from the operations;
7. Supply base and onshore services and logistics; and
8. Disposal and sale of scrap metals and provide a rebate to Chevron Australia.

Not included in this scope of work:

- Retirement of subsea pipelines and other subsea assets is not included in this scope of work;
- Well isolation is not included in this scope of work;
- Process pipework, subsea pipeline and process infrastructure flushing and cleaning is not included in this scope of work.
