

The following mains work-packages are anticipated to be advertised at later stage on ICN Gateway and might change based on the scope of project. They are provided for informational purposes only with an intention to provide local industry an early visibility into the project requirements.

It is not guaranteed that all work-packages may be required, or a design change may also cause the integration of few packages. Local companies are encouraged to keep an eye on ICN Gateway for these packages and register an interest when they become available.

- Temporary fencing
- Waste management (skip / bin hire)
- Dilapidation survey
- Timber hoardings and carpentry
- ISS substation structure
- ISS internal finishes
- Surveying
- Tower cranes
- Services Diversions (elect, mech, hydraulic)
