

MARDIE SALT AND POTASH PROJECT

EXPRESSION OF INTEREST

Project Overview:

The proposed Mardie Salt & Potash Project (**Project**) is located within Australia's major salt producing region on the West Pilbara coast. The Project is proposing to be Australia's first to produce salt and Sulphate of Potash (**SOP**) through the evaporation of seawater.

Package Title:

Power Station

Package Reference:

MAR-016

Package Description:

The Scope of Work covers the provision of labour, plant and equipment, materials, management, supervision and other things necessary to carry out the construction and operation of the Mardie Project power station.

Specific Scope Requirements:

Contractors wishing to be considered must be able to demonstrate their ability to meet the following scope requirements:

- Design, supply, install, test and operate:
 - Medium scale Power Generation Stations;
 - Typically Gas and Diesel fueled generation units;
 - Optimised operation, control and monitoring of Power station performance within a closed network;
 - Specific standby and emergency generation requirements;
 - Reliability based maintenance systems for the life of the asset; and
 - Integration of Power Station operation with a mixture of renewable supply sources.
- Transmission network capabilities:
 - HV transmission network equipment, circuit breakers, disconnectors, transformers, power factor correction, protection equipment (VT / CT / Power) and earthing systems; and
 - HV Switch yard, substation buildings and infrastructure.
- Operational and technical capabilities:
 - Overview of management, supervision and training systems;
 - Provide details of all current certifications, licenses, approvals and permits required to operate Power Generation Plants within WA;

- Demonstrate the level of experience within your organization to build, operate, maintain and optimize power station operation over a 24hr per day basis; and
- Include overview of the processes involved in the development, energization and operation of a Power Station, including management policies, plans and procedures.

Contracting Strategy:	The works will be performed under a Build Own Operate (BOO/T) agreement with Company provided commercial terms.
Forecast Award Date:	Q1 2022
Forecast Construction Commencement Date:	Q2 2023
Generic Pre-Qualification Requirements:	Contractor is required to demonstrate similar scale and complexity of works successfully performed for the stated scope, and be willing to provide past project references (and if necessary, site visits to past projects) to establish market capability to carry out the works.
Expression of Interest:	<p>Contractors are invited to express an interest in this scope of work by registering on the ICN Gateway online platform.</p> <p>Please ensure:</p> <ul style="list-style-type: none">• The Company profile on ICN Gateway is complete, up-to-date and accurate; and• Interest is registered as full-scope or partial-scope supplier (where applicable).
Disclaimer:	<p><i>This package description and target award date is indicative only and subject to change. It is intended to provide a brief outline only of certain works that may be required for the proposed BCI Minerals Project and should be read in conjunction with the BCI Minerals Project description on ICN Gateway. Full scopes of work will be made available to parties invited to tender. There is no undertaking to contract or proceed to a competitive process implied by this form. Further contact with interested suppliers will be at BCI Minerals' discretion.</i></p>
