

MARDIE SALT AND POTASH PROJECT

EXPRESSION OF INTEREST

Project Overview:

The proposed Mardie Salt & Potash Project (**Project**) is located within Australia's major salt producing region on the West Pilbara coast. The Project is proposing to be Australia's first to produce salt and Sulphate of Potash (**SOP**) through the evaporation of seawater.

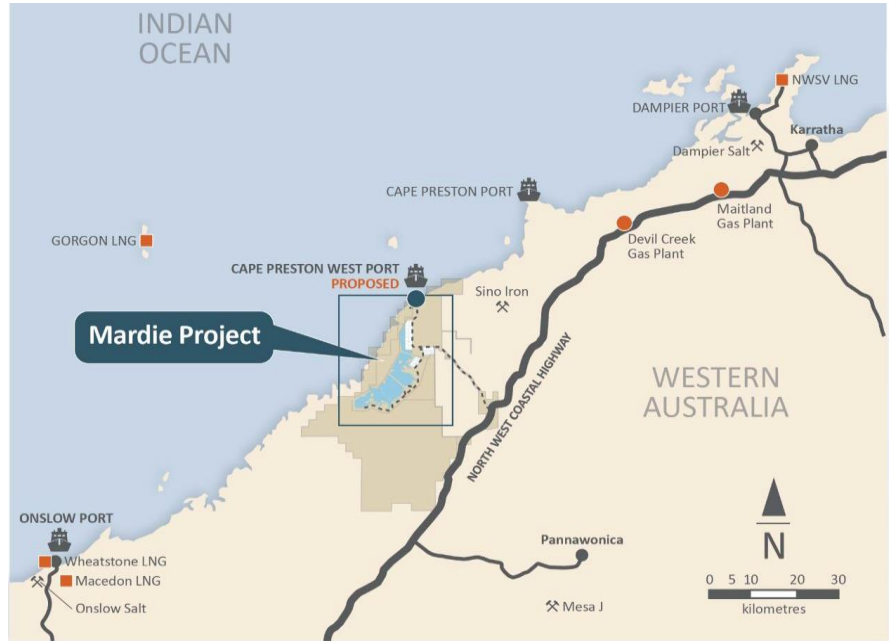

Figure 1 – Project Location

Package Title:

SOP Process Plant

Package Reference:

MAR-003

Package Description:

The Scope of Work covers the design and construction of Sulphate of Potash (**SOP**) Process Plant and associated non-process infrastructure and feed supply haul roads.

Specific Scope Requirements:

Contractors wishing to be considered must be able to demonstrate their ability to design and construct a 140ktpa SOP process plant comprising of the following:

- SOP Process Plant with a feed processing capacity of approx. 150 tonnes per hour;
- Feed material stockpile (configured in windrows);
- Feed material reclaim facility;
- Feed crushing and screening circuit;
- Feed dissolution and schoenite conversion circuit;
- Schoenite flotation circuit;
- Flotation tails dissolution circuit;
- SOP conversion circuit;
- Secondary schoenite crystallization circuit;
- SOP drying circuit;
- SOP compaction circuit;
- SOP storage facility;
- SOP loadout facility;
- Dewatering circuits (inclusive of thickeners and centrifuges) for flotation concentrate, flotation tailings, SOP product and secondary schoenite intermediate product;

- Reagents make-up and distribution circuit;
- civil works (detailed earthworks, concrete slabs and footings);
- electrical works, testing, commissioning and handover; and
- haul roads.

The works consists of all necessary activities including, but not limited to mobilisation and demobilisation, project management, engineering support and QA management, shire approvals, off-site supply of materials, and supply of all plant, equipment and labour.

Contracting Strategy:	The works will be performed under a “Design and Construct” with Company provided commercial terms.
Forecast Award Date:	Q3 2022
Forecast Construction Commencement Date:	Q4 2023
Generic Pre-Qualification Requirements:	Contractor is required to demonstrate similar scale and complexity of works successfully performed for the stated scope and be willing to provide past project references (and if necessary, site visits to past projects) to establish market capability to carry out the works.
Expression of Interest:	<p>Contractors are invited to express an interest in this scope of work by registering on the ICN Gateway online platform.</p> <p>Please ensure:</p> <ul style="list-style-type: none">• Company profile on ICN Gateway is complete, up-to-date and accurate; and• Interest is registered as full-scope or partial-scope supplier (where applicable).
Disclaimer:	<p><i>This package description and target award date is indicative only and subject to change. It is intended to provide a brief outline only of certain works that may be required for proposed BCI Minerals Project and should be read in conjunction with the BCI Minerals Project description on ICN Gateway. Full scopes of work will be made available to parties invited to tender. There is no undertaking to contract or proceed to a competitive process implied by this form. Further contact with interested suppliers will be at BCI Minerals discretion.</i></p>
