WMP-CON-517 Supply of Separation Flotation Cells

Procurement Route

OZ Minerals Musgrave Operations Pty Ltd requires the supply of separation flotation cells for the Minerals Processing Plant from suitably experienced and qualified vendors for the West Musgrave Project.

Requirement / Scope of Works

OZ Minerals is seeking expressions of interest (EOI) for the supply, manufacture, delivery, commissioning and acceptance testing for Separation Flotation Cells to be installed at the OZ Minerals West Musgrave Project located in Western Australia.

Complete copper and nickel concentrate separation flotation cell assemblies for 550 m³/h feed duty comprising:

- Feed boxes and discharge boxes as required;
- Concentrate launders;
- Froth crowders or similar;
- Pulp level (level transmitters) and control instrumentation for cells;
- Flotation air pipe manifold and branches with automatic flow control valve and air flow meter for each cell or bank of cells (as applicable);
- Water pipe manifold and launder water spray nozzles;
- Pinch valve or dual discharge dart valves on tank cell discharge;
- Cell drain and manual dump valves;
- Provision for addition of reagents into the mixing zone;
- Agitator assembly and a remote lubrication system for agitator bearings;
- Wear lining protection to high wear wetted areas including shaft, hub, and impellers;
- Drive assembly including base frames or base plates if required;
- Stainless Steel Rotary coupling and pipe in the agitator shaft suitable for air injection where required;
- Agitator blades shall be suitable for removal from the agitator shaft without removing the shaft.
