

PLUTO LNG TRAIN 1: SCARBOROUGH MODIFICATIONS

MR Number: 26457-110-MRA-MVEF-00001

Title: Process Filters

Scope of Work: ASME Sec VIII / AS1210 compliant process filters shall be in hydrocarbon service and shall be supplied with associated internals (filter elements, cartridge filters, filter baskets, temporary startup mesh, etc) to suit the target filtration efficiencies based on process requirements. Materials of construction shall vary by service and shall range from carbon steel to 304SS/316SS and shall have design pressures up to 9000 kPag and design temperatures in the range of 100°C. Supplier shall have the capability to custom fabricate these process filters for a wide range of gas and liquid flowrates to suit the application

All equipment provided must meet local codes for Western Australia, Project Specifications, as well as any other Australian/local regulations, statutory requirements, and Australian codes and standards as applicable.
