

## **SA-H2H – Trade Delegation – EOI - ICN**

SA-H2H™ is pursuing stronger relationships internationally as part of our endeavours to accelerate development of the South Australian, national and global hydrogen ecosystems and supply chains.

As part of that effort, we are evaluating the opportunity to organise an Australian trade delegation to Europe in April/May 2023 to align with several notable European events, such as;

- the World Hydrogen Summit 9-11<sup>th</sup> May 2023 at Rotterdam Ahoy, Netherlands, and/or the;
- Hannover Messe, 17th-21st April 2023, Germany.

To determine interest in this initiative, SA-H2H™ is inviting expressions of interest for a European/German Trade Delegation on ICN Gateway ([SAHydrogenHubs.icn.org.au](https://SAHydrogenHubs.icn.org.au)).

With established links to the Port of Rotterdam, the Hamburg Hydrogen Cluster, Fraunhofer and other industry connections, we are seeking to create an itinerary spanning a 1-to-2-week period for an estimated 10-20 delegates.

If your organisation is interested in building international connections and collaborating in hydrogen projects, services or research, you may be interested to join this exciting delegation opportunity.

If so, please click 'CREATE EOI', respond to the questions and click 'SUBMIT'.

ICN SA will then provide your response to SA-H2H™ for next stage communications (noting the delegation would only proceed with sufficient numbers).

**Note** – In order to submit an “expression of interest” to a work package via ICN Gateway, you will need to establish a company profile on ICN. If you don’t already have an ICN gateway profile, just select the “Basic” (no cost) option to enter your profile details.
