Expression of Interest	<p>Contractors are invited to express an interest in this scope of work by registering on the ICN Gateway online platform.</p> <p>Prior to completing registration, please ensure:</p> <ul style="list-style-type: none"> ▪ The company profile on ICN Gateway is complete, up-to-date and accurate ▪ Interest is registered as either full-, or partial-, scope of this EOI (where applicable) ▪ ICN Gateway pre-qualification questions have been completed
EOI Closing Date	<p>23 Nov 2022</p>
Contact	<p>Industry Capability Network of Northern Territory</p> <p>https://gateway.icn.org.au/</p>
Project URL	<p>For more information about Arafura Rare Earths Ltd and the Nolans Rare Earths Project please refer to the Company website.</p> <p>https://www.arultd.com/</p>
Disclaimer:	<p><i>This EOI will be used, in part, to establish a list of potential tenderers, providing a general understanding of their capabilities to execute the scope outlined. The EOI will be coupled with subsequent steps and stages in the tender process to be adopted by Arafura Resources Ltd (the "Company"), and applicants' response to this EOI shall not form any part of a commitment or agreement with or on behalf of the Company to proceed or contract with responding parties.</i></p> <p><i>The relevant package details outlined above, and/or scale of scope for this package may be subject to change at the discretion of the Company.</i></p>
Project:	<p>Nolans Rare Earths Project (the "Project")</p>
Project Overview:	<p>Arafura Resources Ltd is developing the Nolans Rare Earths project, which will encompass a mine, beneficiation plant, extraction plant, separation plant, sulphuric acid plant and related Non-Process Infrastructure to be constructed in the Northern Territory. The project site is located on Aileron Station, approximately 135 kilometres NW of Alice Springs.</p> <p>The Project mining operation will use conventional open-pit truck and excavator mining methods, supplemented by drill and blasting for ore and waste. A JORC-compliant Ore Reserve supports a mining inventory for a mine life of 38 years. Mining is at an average rate of 7.6 million tonnes per annum to produce 1 to 1.3 million tonnes of ROM ore each year and 316,000 tpa of concentrate through the hydrometallurgical plant to produce a range of rare earth products and a phosphoric acid by-product.</p>
