

18 January 2023

Dear Supplier,

Expression of Interest (“EOI”) – EOI 009 – Contract Mining & Bulk Earthworks Services

Eva Copper Mine Pty Ltd (the “**Company**”) invites your organisation to provide an Expression of Interest for the **Provision of Contract Mining & Bulk Earthworks Services** for the Eva Copper Project located 75km North of Cloncurry, Queensland.

1. Introduction to Harmony Gold

Harmony is a 70-year-old mining company headquartered in South Africa and listed on the Johannesburg and New York stock exchanges.

In FY2022 Harmony produced 1.49moz of gold with US\$2.8bn of revenue and approximately US\$500m of EBITDA. Harmony is the largest gold producer by volume in South Africa and is a significant operator of gold tailings retreatment facilities. In Papua New Guinea, Harmony owns and operates the Hidden Valley mine and owns 50% of the Tier 1 Wafi-Golpu copper-gold project.

In December 2022, Harmony acquired 100% of the Eva Copper (“Eva Copper”) project, a near-term copper project in North-West Queensland, Australia.

Eva Copper is an multi open pit sulphide and native copper mine producing a copper concentrate. The current feasibility assumes 170 million tonne of ore and 381 million tonnes of waste are mined from seven open pits. The copper concentrator will process ~11.4 million tonnes per annum, operating at 31,200 tonnes per day, through a conventional crushing, high pressure grinding rolls, milling, gravity, and flotation plant, for the fifteen-year life-of-mine (LOM) duration. Construction of the tailings storage facility and a significant creek diversion is also required.

Existing infrastructure surrounding the Project site includes the Burke Developmental Road, located 8.5 km to the east of the Project, which connects Cloncurry to Normanton.

Harmony is updating the feasibility study and progressing front end engineering and design over the next 12-month period prior to a final investment decision (FID). Once FID is achieved construction is expected to take approximately 24 months.

The current feasibility study assumes owner-operator for the open pit mining and some civil earthmoving activities. As part of the feasibility study update, Harmony seeks to evaluate the benefits of a contract mining service, for at least the first 5 years of operations. The contract mining service is expected to commence during the project construction phase.

Therefore, Harmony requests expression of interest in conducting these mining and associated activities which may include stockpiling of materials for construction, tailings storage facility wall build, a major creek diversion and road construction. The inclusion of these latter scopes will be subject to further assessment by the Company and the selected Contractor.

2. Supporting Information

The Eva Copper Mine NI 43-101 (May 2020) Feasibility Study provides adequate baseline information for suppliers to review and prepare a suitable expression of interest submission. This document can be viewed here (https://minedocs.com/20/Eva_Feasibility_Study_1312020.pdf) and as attached to this EOI.

3. Provision of Contract Mining & Civil Construction Services

Vendors must demonstrate their ability to provide similar contract mining and civil construction services broadly in line with the following scope of services.

- Develop mining methodologies and strategies
- Support mine design including layout reviews, waste dump, tailings, etc
- Development of mine plans, schedules, and resource plans
- Provision of suitable mining fleet to deliver planned mine production, including blast hole drilling, excavate load and haul, stockpile handling, road, sump, pit floor and waste dump preparation and maintenance
- Provision of construction fleet to prepare tailings facilities, levee, roads, sumps, laydown areas and other bulk earthworks to required designs
- Provision of experienced operators, supervisors, management, and site SSE
- Provision of blasting services
- Provision of operational consumables such as explosives and diesel

4. Indigenous Communities

Harmony is committed to developing a diverse workforce and inclusive work environment, which includes providing training and career opportunities to local residents of the communities in which we operate. The Eva Copper Project is located on the traditional land of the Kalkadoon People, and the Project is committed to hiring and training of Kalkadoon People. Subject to the technical capabilities, this criterion will be a key consideration in the shortlisting of vendors, release of future tenders, and award of any contracts.

5. Submission Information

Given the high volume of anticipated responses we ask that you keep your expression of interest submission short, specifically addressing the following in your response:

- a) General company information
 - (i) ABN, Company name, Registered address
 - (ii) Contact details (name, email, mobile)
 - (iii) Alternate point of contact details
 - (iv) Headquarter and office locations
 - (v) Company financials
 - (vi) Local and indigenous engagement policies
 - (vii) Prior project information and capability statement
 - (viii) Safety, Risk, Quality, and other accreditations
- b) Specific response based on Eva Copper Mine NI43-101
 - (i) Methodology in providing an integrated service offering
 - (ii) RASCI between the company and contractor provided services
 - (iii) Indicative mobilisation scope and duration
 - (iv) Potential sub-contractor requirements
 - (v) Availability of required equipment
 - (vi) Availability of required resources
 - (vii) Other information considered essential to supporting the contractor's submission

6. Submissions

Submissions are to be lodged via ICN Gateway (Eva Copper Mine portal) by 5pm AEST Tuesday 7 February 2023 using the expression of interest form as provided within the ICN gateway. We seek to shortlist vendors throughout February and initiate discussions from March.

Enquiries can be made to eva.procurement@harmonyseasia.com

Yours sincerely,

Eva Copper Mine Pty Ltd
