General Road Maintenance Activities

Package Number: 25977-000-HC3-UB00-00090

Package Title: General Road Maintenance Activities

General Description

Rio Tinto's Amrun Project is located approximately 40 km south-west of Weipa in far North Queensland, Australia. The Amrun Project site will require the services of a Contractor for general road maintenance activities.

Specific Scope Requirements

The Contractor's Scope of Work shall include:

Dust suppression on the Site laydown areas and the Site roads in the general construction area with the use of chemical dust suppressing agents. Dust suppression should include the provision of a minimum two water trucks of various sizes.

Road maintenance on the Site access roads involving the maintenance grading of unsealed roads, repairing any areas developing bull dust type holes, repairs to the road network after the wet season, and the installation and relocation of site signage and road furniture. This will include 20km of off-lease road maintenance, and approximately 100km of construction roads requiring re-sheeting annually.

The maintenance of existing storm water, erosion and sedimentation controls in common areas and the design and installation of new storm water, erosion and sedimentation controls.

The provision of a potable water haulage service from Weipa and/or Aurukun to Site to fill the various storage tanks and the on-site delivery of potable water to the various locations of crib and office facilities, along with required water quality testing. This will involve transportation of approximately 25000L of potable water per day from local source.

Spill clean-up, the excavation of contaminated soils, and the safe removal of contaminated waste such as oily rags and oily absorbent matting to the Site waste transfer facility.

To perform the Scope of Works, it is anticipated the following equipment could be required:

- Light vehicle(s)
- Back hoes(s)
- Grader(s)
- Compactor(s)
- Loader(s)
- Water cart(s)
- Side tipper(s)/Rear Dump Truck(s)

Forecast Award Date: Q1, 2017

The primary Contractor may utilise the ICN Gateway to procure subcontractors for partial scopes of work. Expressions of interest for works associated with this scope are therefore encouraged to be submitted to ICN.

Instructions to Tenderers

If your business possesses the capability and capacity to perform the stated scope of work, please submit a registration of interest via the ICN Gateway at www.amrun.icn.org.au.

Please ensure that:

- Your company profile on ICN Gateway is complete, up-to-date and accurate
- You register your interest as a Full Scope or Partial Scope supplier (where applicable), and
- You respond to all project-specific questions via the ICN Gateway.

More Information

Please contact the Industry Capability Network Queensland on +61 (7) 3364 0676 should you have any enquiries regarding this scope of work.

More information about the Amrun Project can be found on the Rio Tinto website www.riotinto.com.

Disclaimer

Scope of Work is indicative only and is intended to be used as a summary description of work which may be required by Rio Tinto and may be subject to change. Full scopes of work will be made available to parties that are invited to tender. There is no undertaking to contract or proceed to a competitive process implied by this form. Further contact with interested suppliers will be at Rio Tinto's discretion.
