

CHEVRON AUSTRALIA - OPERATIONS

TITLE: U-3223 – Valve Maintenance Services

DESCRIPTION: Chevron Australia (Company) is seeking expressions of interest for the provision of valve maintenance services as part of a panel contract arrangement for Company's assets as follows:

- WA Oil Asset at Barrow Island, WA;
- Gorgon LNG Facility at Barrow Island, WA;
- Wheatstone LNG Facility at Onslow, WA;
- Wheatstone Offshore Platform, WA;
- Company operated mainland facilities in WA; and
- Any Contractor operated facility that is used in the provision of services.

Company has all makes and models of the following valve types:

- Non actuated valves
- Actuated on/off valves
- Actuated throttling and severe service valves
- Pressure relief devices
- In addition to the above valve types, the following valves are also used on Company assets:
 - Check valves
 - Ball valves
 - Butterfly valves
 - Gate valves
 - Globe valves
 - Control valves
 - Pressure relief valves
 - Emergency Shutdown Valves

The provision of valve maintenance services primarily involves:

- Supply of WA and Australian located, suitably qualified and experienced personnel, competent in the repair and overhaul of all valve makes and models;
- Provision of and/or access to a fit for purpose valve test and repair facility/workshop with lifting facilities;
- Valve diagnostic services;
- Valve assembly and quality inspections;
- Capability to mobilise personnel at short notice (within 12 hours) for maintenance and breakdown support 24 hours per day, 365 days per year;
- Provision of 24 hour engineering support telephone help line in Australia;
- Understanding of valve criticality and valve integrity;
- ISO 9001:2015 accreditation;
- Repair recommendations and engineering support;
- Performing root cause analysis and reporting on all valve failures;
- Storage and warehousing of valves at Contractor's WA premises;
- Procurement services for replacement valves and new valves;
- Recordkeeping;
- Ability to provide evidence for materials traceability and positive material identification (PMI);

- Development of a management plan for chemical-impacted valves;
- Understanding of valve preservation techniques and storage best practice; and
- Ability to work collaboratively and build relationships with the incumbent Company valve contractors.
