

OZ Minerals has invited selected energy retailers to participate in this 'Expression of Interest' as part of our commitment to create value for our shareholders, employees, suppliers, community and government.

By the end of 2016 OZ Minerals is seeking to develop a Sustainable Energy Partnership with a proven energy market participant. The partnership will seek to leverage expertise in solutions and options available to meet our energy requirements.

In support of this, OZ Minerals has elected to seek interest through engagement from a select group within the energy market to form this strategic partnership.
