Supply of Rock

Package Number: 25977-000-FMR-CB01-00001

Package Title: Supply of rock

General Description

Rio Tinto's Amrun Project is located approximately 40 km south-west of Weipa and 40 km north of Aurukun, western Cape York Peninsula in far North Queensland, Australia. The Amrun Project will require the supply of rock during the construction of Arraw Dam.

Specific Scope Requirements

The scope of work includes but is not limited to the following:

<i>Quantity & Unit</i>	<i>Description</i>
16,900 Tons	Rip Rap Type 1 (600mm depth)
25,600 Tons	Rip Rap Type 2 (300mm depth)

1. All material supplied shall be in accordance with of the properties specified in below:
 - a. Rip rap consist of hard durable rock fragments obtaining from quarrying include materials, either in their natural state or processed or combined with other suitable materials to produce a material conforming with the requirements of the Contract.
 - b. The material shall comprise slightly or less weathered rock, be of high to very high strength in accordance with AS 1726 and have a minimum specific gravity of 2.55 or higher in accordance with AS 1141.6.
 - c. The rock should be free from laminations and durable to withstand long exposure to weathering and shall not be subject to erosion or disintegration in water. The rock shall be angular and irregular in shape, having a thickness not less than two thirds of the length. The rock shall be supplied in loads that meet the specified grading so that blending on site is not required.
 - d. Rock material shall be selected and processed where necessary to conform with the specified requirements. Processing shall include where necessary, crushing, screening, separation, recombine, addition of other approved materials, and any other operation necessary to produce a rip rap material to conform with the specified requirement. Borrow areas from which the rock materials are obtained shall be stripped of earth, vegetable matter and any other deleterious material. The method of selection and processing at the pit or on the road shall be approved by the Company before full scale production commences.

Forecast Award Date: 1Q, 2017

The primary Contractor may utilise the ICN Gateway to procure subcontractors for partial scopes of work. Expressions of interest for works associated with this scope are therefore encouraged to be submitted to ICN.

Instructions to Tenderers

If your business possesses the capability and capacity to perform the stated scope of work, please submit a registration of interest via the ICN Gateway at www.amrun.icn.org.au.

Please ensure that:

- Your company profile on ICN Gateway is complete, up-to-date and accurate
- You register your interest as a Full Scope or Partial Scope supplier (where applicable), and
- You respond to all project-specific questions via the ICN Gateway.

More Information

Please contact the Industry Capability Network Queensland on +61 (7) 3364 0676 should you have any enquiries regarding this scope of work.

More information about the Amrun Project can be found on the Rio Tinto website www.riotinto.com.

Disclaimer

Scope of Work is indicative only and is intended to be used as a summary description of work which may be required by Rio Tinto and may be subject to change. Full scopes of work will be made available to parties that are invited to tender. There is no undertaking to contract or proceed to a competitive process implied by this form. Further contact with interested suppliers will be at Rio Tinto's discretion.
